PLANAT ERP

ERP-software FEPA for the Automotive industry

Profit from our profound industry knowledge!

Automotive suppliers must be multidimensionally capable of meeting high expectations. 'Just-in-Time' production represents a challenge due to its consideration of a high rate of variant diversity and ever shorter product cycles. Success, therefore, depends on the ability to ensure quality standards and warrant timely deliveries.

The branch object 'Automotive' respects the particular demands of this industry. Be it mass or make-to-order production, FEPA can support the entire logistics chain. It ensures support by starting with pre-series orders dispatched by EDI, to production planning, to production control, and ends with final distribution. The EDI functionality is an important branch-specific component of the automotive supply sector. Considering the EDI guidelines, FEPA EDI is completely integrated into the order processing, and it is based on current industry standards.

FEPA offers you a technologically up-to-date solution and supports your company in optimizing all essential business areas. With complete transparency, short-term access to current key figures and efficient production controlling, you can be sure that you are fully informed about the current situation of your company. In this way, FEPA becomes a software tool that supports your company today and in shaping a successful future.
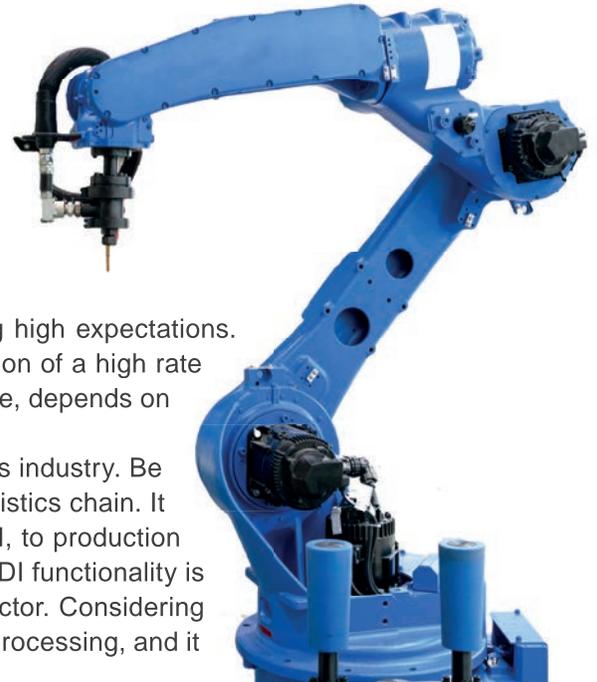

Standard does not exclude individuality

The intelligent development structure of the **FEPA 3-components-concept** makes it possible to further extend our basic software. It does this with the industry sector component 'Automotive' along with the corresponding standard add-ons. Thus, FEPA is a standard software which is particularly designed to meet your needs.

1 FEPA Basis
sales, purchasing, logistics, materials management, production planning/production control, production data acquisition / staff work time logging, FEPA.PETL (process-oriented information system)

2 FEPA Industry Sector Component
EDI integration, EDI in the purchasing department, cumulative quantities, material-handling equipment, dispatch processing

3 FEPA Functional Add-ons
business intelligence with dashboard, document management, continuous batch management, quality management, customer complaint management, strategic planning, workflow-suite and much more
