

## ERP-software FEPA for the Mechanical and Plant Engineering industry

### Profit from our profound industry knowledge!

FEPA portrays the comprehensive functionality of an innovative ERP standard software. Your branch-specific needs in the mechanical and plant engineering industry are continuously respected and will be implemented throughout your business. The difference between success and failure in daily market competition depends on qualitative decisions and a swift reaction time.

FEPA can support your company with the improvement of all your vital business areas. With FEPA's complete transparency, its access to current near-term data, and its efficient production control, customers can be sure that they will proficiently be informed about their company's current situation. Accordingly, FEPA is a software tool that can support your company today, and lead you towards a successful future.

### Standard does not exclude individuality

The intelligent development structure of the **FEPA 3-components-concept** makes it possible to further extend our basic software. It does this with the industry sector component 'Mechanical and Plant Engineering' along with the corresponding standard add-ons. Thus, FEPA is a standard software which is particularly designed to meet your needs.

#### 1 FEPA Basis
