PLANAT ERP

ERP-software FEPA for the Metal Working industry

Profit from our profound industry knowledge!

Companies within the metalworking industry operate within a highly competitive market. The rising costs of materials and energy put considerable pressure on prices both simultaneously and with declining margins. At the same time, customers are demanding reliable deliveries and assured quality. It is therefore important to keep an eye on the lowering of throughput times, unit costs, and appropriate flexibility for alternating delivery schedules.

The FEPA industry sector component "Metal" offers a perfect platform for all the processes found within metalworking companies and contract manufacturers. Thereby, FEPA comprehensively covers all features in the metal processing procedure: casting, stamping, pressing, milling, drilling, turning, forging, welding, and sintering. Our ERP-software displays all business activities reaching from purchase to customer-specific development, and to complex delivery management. Customers receive fluent business processes that generate transparency and form a reliable basis for decisions.

Standard does not exclude individuality

The intelligent development structure of the **FEPA 3-components-concept** makes it possible to further extend our basic software. It does this with the industry sector component 'Metal' along with the corresponding standard add-ons. Thus, FEPA is a standard software which is particularly designed to meet your needs.

1 FEPA Basis
sales, purchasing, logistics, materials management, production planning/production control, production data acquisition / staff work time logging, FEPA. PETL (process-oriented information system)

2 FEPA Industry Sector Component
production data acquisition with multiple-machine operations, batch management, tool management, management of material-handling equipment, swarf management, metal surcharges, scrap metal management, provision of material-handling equipment, tool planning, tool cycle

3 FEPA Functional Add-ons
business intelligence, CAD/PDM integrator, CRM, DMS, EDI, FEPA Mobile, customer administration, MDE integration, project management, quality management with rejects controlling, customer complaint management, workflow-suite and much more
