

## ERP-Software FEPA WfbM

### Corporate Management / Resource Planning / Workshop Management

For people with disabilities, active participation in our social working environment should be ensured and at the same time a needs-based living space should be created. This is the objective of the workshops for disabled people (WfbM) and it requires an unusually broad spectrum of work areas, since suitable work has to be found and offered for each individual disabled person.

With our ERP-software FEPA WfbM, which maps all commercial business processes with the special features of workshops for disabled people, the market economy framework conditions for this goal are created. Optimize and design your individual work processes with FEPA. The 'central theme' of the FEPA processes and the update capability are retained despite a wide range of customization options.

### Standard does not exclude individuality

The innovative development of the business software FEPA is based on our intelligent **FEPA 3-components-concept**. This means that all three FEPA standard components can be combined individually.

#### 1 FEPA Basis WfbM

sales, material management, purchasing, accounting, asset accounting, cost accounting, costing, controlling, production planning / production control, production data acquisition

#### 2 FEPA Industry Sector Component WfbM

Through its individual combination of standard components, FEPA WfDP is able to present highly differentiated and workshop-specific forms of organization and production. Attributable equalisation levy: there are several methods available for the calculation of the work performance and the wage fraction.

#### 3 FEPA Functional Add-ons

All of the FEPA standard functional add-ons can be inter-divisionally added at any time:

- BI-Designer
- CAD/PDM-Integrator
- CRM
- document management
- project management
- product configurator
- quality management
- workflow-suite
- and much more

### WfbM-specific demands

- intra-company orders
- intra-company movements of goods
- intra-company cost allocation
- menu management 'Kitchen'
- recipes with purchasing information
- ticket office connection
- and much more

## FEPA WfbM: The Key To Success

FEPA offers important key factors in workshops for disabled people (WfbM), such as innovative and efficient solutions for the planning, implementation and documentation of all business processes. The processes are supplemented by the industry sector component WfbM, which depicts the distinctive forms of organization and production typical for these workshops.

WfbM-specific add-ons, for example for internal orders, service allocations, offset charges and for cost unit accounting complete our solution. The flexibility to adapt to the order situation and the constantly changing requirements is guaranteed.

### Ergonomics

- innovative operating concept
- ergonomic user interface
- clear structure
- excellent navigation
- excellent search functions
- intuitive
- customizable

## Commitment and Innovation officially confirmed

PLANAT was awarded the Oskar Patzelt Foundation's "Great Price for Medium-Sized Enterprises", which is the most important business award. This makes PLANAT one of the companies that are characterized by strong values, clear strategy and flexibility as well as innovative strength and customer proximity.
