

ERP-software FEPA for the Electrical Engineering and Electronics industry

Profit from our profound industry knowledge!

Companies in the high tech and electrical industry must launch their newly developed products as quickly as possible in order to realize profitable business in this highly competitive market. Therefore, a transparent supply chain is important to absorb a rapid drop in prices and changing needs.

FEPA synchronizes global trade as well as supply and demand chains. At the same time, product life cycles and processing times are improving. A real-time environment supports all workflows from the concept phase to sales.

FEPA's practical functionality offers a multitude of possibilities. Our customers can administer the receipt of orders, manage internal and external production processes, and conduct distribution operations. Moreover, they can make use of electronic data interchange and E-business. Another important characteristic of FEPA is the integrated processing and tracing of project orders.

Standard does not exclude individuality

The intelligent development structure of the **FEPA 3-components-concept** makes it possible to further extend our basic software. It does this with the industry sector component 'Electronics/Electrical Engineering' along with the corresponding standard add-ons. Thus, FEPA is a standard software which is particularly designed to meet your needs.

1 FEPA Basis

sales, purchasing, logistics, materials management, production planning/production control, production data acquisition / staff work time logging, FEPA.PETL (process-oriented information system)

2 FEPA Industry Sector Component

alternative bills of material, substitute articles in the bills of material, article number-producer-distributor-relationship, list of resources, retrograde assessment of demands, serial numbers management

3 FEPA Functional Add-ons

CRM, service management, document management system, FEPA Mobile, product configurator, CAD/PDM integrator, quality management, project management, workflow-suite, business intelligence with dashboard and much more
